

Dear Sir/Madan

This is _____, a 25 year old female. I am currently working as an English teacher in South Korea. I am passionate about teaching and working with children. I work with different age groups therefore I understand and know how to work with kids at different ages. I have experience teaching phonics, grammar, free speaking classes, and overall conversing with students of all age groups to help them better understand.

I love working with kids, I am easily adaptable, empathetic and sometimes can be quite goofy with my students and my colleagues which makes them warm up to me easily. I believe that for our students to understand us or even give us an ear is if we meet them at their level and so far this method has proven to be successful for me.

My students love engaging with me and being playful together makes it easy for them to understand and learn without the fear of making mistakes or being ridiculed. Lastly my passion for teaching is what makes working fun and never feel like a chore, for me everyday is a fun field trip day therefore I always look forward to my day with my students. I would really love an opportunity to be part of your academy and your community.

Thank you for your consideration
