

Dear BRIDGE Korea,

My name is . I am 32 years old and currently living near Boston in the United States. I was born in America and consider myself very American.

I had TEFL jobs in Asia for three years after I completed my Bachelor's degree at UMass Amherst. Those are some of the best memories of my entire life. One thing that stuck with me the most were my students. They were so fun and hard-working and sweet. They cared about learning and I loved to bond with them. I tried my hardest to make them love learning English. Happy students always learn better, and I was determined to keep my classroom upbeat, fun and happy. Learning English is so important in our modern inter-connected world. I always reminded my students that learning English wasn't just to pass an exam. Learning English would allow them to travel, to make friends all over the world, and to become part of the global conversation. English is the medium in which people from different countries communicate and I want my students to have those opportunities.

I genuinely love teaching. When I came back to the US after teaching English abroad, I was an assistant teacher here in Massachusetts, USA for two years. After the COVID year, I pivoted to service and sales jobs, but part of me always missed working with students. I particularly enjoy teaching English abroad because knowing English is such a vital skill. English can open up so many opportunities for students abroad and I want to be part of that journey.

My degree is in Population Studies. I did my university research project on low birth rates in South Korea and the use of reality television shows to encourage pro-natalist thinking amongst the public. I also minored in Asian & Asian American Studies. I did a 120-hour TEFL certification before I taught in China for the first time in the Spring of 2015. I had more TEFL training as part of that TEFL internship. I also won the Fulbright ETA scholarship for South Korea in 2016 and had extensive TEFL training as part of that program. One of my lesson plans was distributed as a great example to the entire program consisting of over 120 teachers!

In high school, I was awarded the Academic Superlative for best English student in my entire graduating class of over 400 students. I have had a love of reading and writing and language my entire life. I have taught myself foreign languages as a hobby. I speak conversational level Korean (so I will know what the students are saying!).

I have started working on my documentation and getting things apostilled.
I hope to hear from you soon!

Sincerely,
